

wifiplus® smart building

- + user**safe**® wifi network
- + energy management & monitoring
- + building automation & security
- + marketing services

mobile applications allow franchise owners to monitor and compare multiple retail locations from their mobile devices... wherever they are!

wifiplus tip:

offering wifi allows more customers to **"check in"** at your business on social media websites like facebook!

wifiplus® gives franchise owners and operators the ability to view the energy usage of multiple locations. you can see how each franchise is using energy - capitalize on what techniques are saving money and stop money-wasting behaviors! receive alerts for uncharacteristic energy usage, broken equipment or going over budget.

did you know?

restaurants spend an average of 3 times more energy than other businesses!

energy usage is the largest uncontrolled cost for restaurant owners, wifiplus® helps restaurant owners get control over their energy spending.

did you know?

64% of people choose venues with free wifi!

it's undisputed that today's shoppers, restaurant goers, residents and guests expect reliable wifi everywhere they are. customers prefer venues with free wifi and want to remain connected to their smartphone, email, social media and more. wifiplus® allows businesses to offer their customers wifi for free!

save up to 30% on energy AND provide your customers with wifi!

the 'apartment of today'

what was once considered to be the 'apartment of the future' is quickly becoming a reality. residents can control virtually every aspect of their apartment via their tablet or smartphone - from anywhere! imagine turning on your A/C, dimming the lights and setting the radio to your favorite station... before you even leave the office! left home and afraid you left on an appliance? just check your smartphone. with **wifiplus®**, the apartment of the future is possible today!

get control!

- increase profits
- lower spending
- grow your business
- attract customers

? what industries can benefit from **wifiplus®** ?

multifamily: residents can control virtually any aspect of their home via mobile device, including thermostats, appliances, lighting, A/V and more!

commercial & hospitality: restaurants and retail can save up to 30% on their energy spending and offer wifi free in their venues. multiple venues can be monitored - all via mobile applications!

assisted living: monitor and control energy usage and receive health and security monitoring while providing property-wide wifi.

why choose spot on networks?

not all wifi providers are the same - just like not all properties are the same. spot on networks is unique in the industry. we custom engineer, design and deploy networks that are as unique as your property. our secure, fully managed and monitored networks are solving the most pressing problems facing today's building owners.
