

Steam System Optimization Seminar

Spirax Sarco invites you to attend a one day training event covering all facets of steam energy conservation.

By working alongside Spirax Sarco, your company can achieve energy savings and process improvements, ultimately reducing impact on the environment. Spirax Sarco understands that energy costs typically amount for over 50% of operating expenditure, with the generation of steam being one of the largest components.

Through our range of Steam System Services and products, designed specifically for your needs, we aim to help you achieve the optimum performance from your steam and condensate system, allowing you to focus on your day-to-day operations.

Date: **Wednesday, May 22, 2013** **Time: 8:00 AM - 5:00 PM**
RSVP by May 15, 2013

Location: **Spirax Sarco, Inc**
North American COE for Metering
2150 Miller Drive, Longmont, CO 80501

Lunch will be served on-site.

Come see our state-of-the-art factory where our flowmeter product line is manufactured. Spirax Sarco will host a reception and welcome dinner on Tuesday, May 21, 2013 at 7:00 PM. Attendees are responsible for all travel and hotel expenses.

Brenda Holton
Phone: 1-800-356-9362
E-mail: bholton@spirax.com

Who should attend?

Engineers, designers, energy engineers/managers and utility managers who are responsible for steam system design and performance.

Participants will learn...

How to effectively manage and validate their energy conservation measures within their steam system.

Agenda

- Boiler operation optimization
- Steam distribution best practices
- Heat transfer best practices
- Condensate recovery optimization best practices
- Flowmeter best practices for energy conservation
- Viewing of "Inside the Boiler" video
- Introduction to DOE-EERE best practice steam program
