

Fibroid Awareness Week

APRIL 22-27, 2013

Fibroids affect 1 out of 3 women, many of which believe that hysterectomy is their only option. That's simply not true.

**Be fibroid-free.
And surgery-free.**

Join us April 22-27, 2013 to celebrate *Fibroid Awareness Week*. Help spread the word on fibroids. Learn about a non-surgical cure called embolization and see why pregnancy is possible after fibroids.
