ETi's Linear LED Tube To Illuminate LIGHTFAIR® International 2013

New 120LpW Product Featured at Premier Lighting Show April 23rd – 25th

Cleveland, OH, -- April 12, 2013 – ETi Solid State Lighting, Inc. (ETi), an emerging leader in the LED lighting industry, is showcasing its new 120 Lumens per Watt Linear LED Tube at LIGHTFAIR® International, April 23rd - 25th, 2013.

ETi's linear tube LED product will be prominently displayed in Booth #1415 at LIGHTFAIR® International, the premier event for the lighting industry and North America's largest annual architectural and commercial trade lighting show. The 120 LpW linear tube brings the perfect marriage of lighting, design, technology, and innovation into brilliant display, sharing the theme of LIGHTFAIR® International.

“Working with ETi's integral driver LED tube line over the past year has enabled me to secure lighting upgrades and energy solutions contracts with a number of major national retailers. In fact, the light quality, performance and efficacy of the ETi Solid State Lighting linear tube line is unmatched in the industry.” said Mike Stringer, National Accounts Manager at FSG Energy. Stringer continued, “With improved thermal management and non-pixelation, ETi's integral LED tubes have a total value proposition that I have not found in any other tube product. The addition of a 120 LpW product to the line further reinforces that ETi is on the cutting edge of engineering and the solid state lighting industry.”

“We couldn't be more proud of the attention our 120 LpW Linear LED Tube has been receiving. This only builds upon the accolades and endorsements that our current portfolio of linear LED tubes have received from our customers,” added David Rubin, President of The Americas for ETi Solid State Lighting, Inc. “The success FSG Energy and other ETi customers are experiencing with our new products is acknowledgement of the outstanding engineering and product development work being done at Elec-Tech International.”

More information about ETi's products is available at www.etiled.us or by visiting Booth #1415 at LIGHTFAIR® International in the Philadelphia Convention Center, April 23-25.
