Getting documents approved can be a very time-consuming process for clinicians. Using FreeMe, clinicians can now review and action documents quickly from a unified, streamlined interface.

The key design focus was to make it as easy as possible for clinicians to approve documents, with as little as a single tap.

Upon login, a clinician is presented with a list of all dictations with documents that require approval. The clinician can preview documents

clinician can add notes for the secretary. These notes are attached to the dictation for review in the BigHand for Healthcare desktop client.

FreeMe broadens the range of your Trust's BigHand installation by enabling clinicians to review and approve documents away from their desks. FreeMe provides similar functionality to the Document Console in the BigHand for Healthcare desktop client, but with the added benefit of allowing users to work remotely.

in common formats (Microsoft Word, rich text and plain text), quickly navigate between items, and effortlessly approve or reject them, or choose other steps in an advanced workflow.

When the clinician actions a document, FreeMe automatically opens the next item that is awaiting approval. If a document is rejected, the

FreeMe adheres to IG requirements, making it NHS-ready. All documents displayed by FreeMe are encrypted and files are removed when the app is closed. Access to documents is regulated by BigHand's robust system of access control, and communication between the device and the server is secured with SSL encryption.
