

Forex Profit Model: Review Examining Josh Schultz's Trading System Released

SUMMARY: WealthSpringMarketing.com the premier Forex trading and education website releases a review of Josh Schultz's Forex Profit Model trading system and new "Forex Aviator" automated trade finding technology.

Forex Profit Model, the previously sold out trading system from veteran Forex trader Josh Schultz has been re-released creating a buzz of excitement throughout the foreign exchange trading community, and provoking a critical review from WealthSpringmarketing.com's Tiffany Hendricks.

"Josh Schultz's Forex Profit Model promises to offer traders a system for consistently profitable Forex trading that is simple and easy to use," reports Hendricks. "We were eager to review to program for our website visitors and in particular to check out Schultz's automated "Forex Aviator" to see how it performs compared to other automated trade finding tools."

Hendricks' Forex Profit Model Review reveals that Schultz's Aviator watches the market for users freeing them from the need to constantly monitor their computer screens. The program then signals the user when it finds a perfect setup. However, the decision to move forward with the trade is still left to the human running the program. Hendricks explains the value of using this software:

"The software doesn't make human errors and will pinpoint the perfect setups like clockwork allowing users the freedom to do other things without worrying about missing anything," says Hendricks. "That said, there are some things no computer can know about, like developing political situation or important financial news announcements, so it is key that the trades themselves are put through by the end user and not a robot. While there is a lot more to the program than the Aviator, we focused on it in our review because for many traders this sort of automation is the most exciting feature, at the end of the day they are just sick of sitting in front of the computer and want a break."

In addition to the Forex Aviator, Forex profit Model customers receive 4 DVDs explaining in minute detail how to trade the Forex Profit Model, an illustrated trading manual, a cheat sheet, as well as membership in Josh Schultz's "Trading Floor" member's area where users can share trading secrets and benefit from each others success trading the same system
