ExpressPod

IT'S LIKE MONEY IN YOUR POCKET

Dear [FirstName],

Application silos are money pits. If you're using dedicated servers and storage for each key application because you don't want to risk the possibility that one could crash and bring down others on the same system, you're likely a victim of server sprawl.

Why? Because most of these systems are likely only running at 10-20% of their capacity. **This kind of waste can eat away at your bottom line.**

ExpressPod™ with VMware®, a pre-tested solution from industry-leaders Cisco®, NetApp® and VMware, can help you consolidate and virtualize your environment to not only save money, but to reduce complexity, simplify management, and even enhance data protection.

Do you have any idea how much money this could save you?

Find out, or give us a call at 242-359-3668 and we'll walk you through the numbers, as well as how ExpressPod with VMware works.

You are welcome to join us on May 23rd for an exclusive presentation by NetApp and Cisco. [Click here](#) to request an invitation.

THE COST OF IT INEFFICIENCY
