

AccuProcess Releases Version 3.1 of its Business Process Modeling Software

AccuProcess Modeler continues to innovate with easiest process modeling solution for business users

Chicago, IL – April 29, 2013 - AccuProcess, a provider of innovative business process modeling software, today announced the release and availability of its next generation Version 3.1 of the AccuProcess Business Process Modeler product.

Business Process Modeling, one of the fastest growing areas of enterprise technology, enables businesses to increase efficiency and stay competitive through an enhanced understanding of day-to-day business processes and the ways they can be improved. AccuProcess provides an intuitive and powerful business process modeling software designed specifically to be easy to learn and use for any businessperson.

The improvements and innovations in this version 3.1 of the AccuProcess Modeler are part of an ongoing process to make the product the best resource available to business users, managers and analysts for process improvement. They are a direct result of suggestions and feedback received from hundreds of users and customers.

Some of the many updates in the new version of AccuProcess are:

Improved Process Mapping

- Option to show process model name on the diagram image
- Ability to increase the size of the canvas area for larger process diagrams
- Support for BPMN v2.0 icons

Improved Documentation

- Add sub-labels to process objects
- Improved layout for better process documentation

Improved Simulation

- Simulate parallel steps/path execution
- Support for more international currencies

General

- Install and use AccuProcess on network drives and Citrix environment
- View-only version of AccuProcess to share models

“Our goal is to ensure that AccuProcess stays the easiest, affordable and most powerful business process modeling software in the market. We will continue to invest and innovate to make sure our customers have the best experience and get the most value from our solution.” said Deepak Singh, President of AccuProcess.

The new AccuProcess Modeler v3.1 is now available for download, evaluation and purchase at the AccuProcess website. This new version will run on both Windows and Apple Mac OS computers.

Current customers interested in upgrading to the new version can simply download and install the new version.
