

Easy Paycheck Formula 2.0: Review Examining Sara Young's "Newbie Friendly" Marketing Course Released

SUMMARY: *HonestyFirstreviews.com releases a review of Sara Young's Easy Paycheck Formula a training course for internet marketing business people looking to increase revenue.*

Easy Paycheck Formula 2.0 reviews are popping up all over the web following the much anticipated release of Sara Young's internet marketing training course. HonestyFirstReviews.com's Tiffany Hendricks has decided to reveal her findings on the new program in an investigative write up.

"We were eager to take a look a Young's course as it promises to provide a unique marketing system that intends to help fledgling IM businesses grow and thrive in this ever changing marketplace," reports Hendricks. "Many of our website visitors operate small, fledgling businesses and do not have the capital on hand to make expensive media buys in order to get traffic. We wanted to learn more about Young's no-cost traffic generation strategies to see if we thought they were worth recommending to our followers or using in our own businesses."

While many in the online marketing world have experienced decreased web traffic following recent changes to search engine algorithms, Young's training course shows online marketers how to benefit from these changes and get more organic traffic to their offers. However, as Hendricks notes in her review Young's strategy is not dependent on search engine traffic, something she sees as a benefit.

"Many businesses operating online have found out the hard way that depending on any one source for all of their traffic is just asking for trouble," says Hendricks. "In her program Young first shows her customers a couple of simple methods for getting no cost traffic right away, without needing to rely on any search engine. Later in the course she gets into some very current, and ethical strategies for getting ranked highly in the search results, which of course can really help to scale up one's business revenue. All the training is 'newbie friendly' meaning that there aren't any complex technical skills needed in order to utilize this system which makes it a good starting place for marketers just learning the ropes. However, seasoned marketers may also benefit from Young's techniques, as they may prove to be a highly efficient way to test out new niche markets before launching all out advertising campaigns"
