

# BASWARE ANALYTICS

**Gain Actionable Insight into Spend, Processes KPIs and Suppliers.**  
 Do you have your finger on the pulse of spend in your organization?  
 Real-time visibility into purchase-to-pay processes?

Insight into spend, process KPIs and supplier metrics not only drives savings to your bottom line, but it also gives you critical control over your financial operations. Basware Analytics provides all of these capabilities and more in one easy-to-use, highly visual purchase-to-pay reporting solution. You'll uncover bottlenecks and opportunities for savings, as well as ways to streamline operations for greater efficiency and control.

### Insight from the purchase-to-pay expert

Basware Analytics is based on over 25 years of global leadership and best practices in purchase-to-pay. It gives you a holistic view of your operations, with actionable insights and drill-down visibility to share across your organization and beyond.

### Out-of-the-box solutions deliver fast ROI

Basware Analytics includes built-in reporting that can be easily implemented to deliver fast ROI. Its packaged dashboards, reports, graphs and KPIs allow you to quickly identify ways to optimize spend, improve cash management and supplier performance, as well as reduce costs and streamline processes.

Operating on the secure Basware SaaS platform or on-site, Basware Analytics accesses all data stored within the integrated Basware Purchase-to-Pay solution.

### Valuable insights into spend, cash flow and purchase to pay

Basware Analytics' KPIs monitor such metrics as matching rates, on-time payments, spend under management, and cycle times. You can drill down into root-cause analysis to easily identify bottlenecks and uncover opportunities for savings.

The tool's interactive data filtering gives you the ability to slice and dice the data in any way, e.g., spend volume by category, geography or business unit and other relevant dimensions.

### Advanced graphical data: It's all in how you see it

Basware Analytics' graphical data visualization and reporting tools make data easy to view. The graphical representations enable you to quickly identify patterns, bottlenecks, and trends. Users can view the information in the pre-built reports and also create their own customized graphics.

### Easy empowered decision making and collaboration

Basware Analytics is easy to implement organization wide, so employees are instantly empowered to make better informed decisions. The reports are designed to address the specific reporting needs of different functions and roles within your organization. Also, users can view and edit reports as needed through web browsers and iPads, giving them insights anytime and anywhere.

Basware Analytics leverages data across the entire purchase-to-pay process, facilitating better collaboration between departments across the organization. For example, AP and Procurement departments can identify the top suppliers and trends in spend and work together to identify savings opportunities and improve supplier relationships.

### Easy ad-hoc reporting reduces need for consulting

Basware Analytics' easy-to-use ad-hoc reporting reduces the need for using outside consultants every time new insights are required. It empowers your key users to find the information they need as self-service, while having access to Basware training and professional services for the most complex and specific reporting needs that may arise.

Basware Analytics gives you the edge you need to grow your business. By gaining insights into purchase to pay, you can better manage spend, cash and supplier relations, while improving processes and ultimately the bottom line.

### Why Choose Basware Analytics

- Developed by the process expert in purchase to pay
- Built upon 30 years of best practices
- Provides holistic, integrated view across purchase-to-pay process
- Highly visual, easy-to-use reporting empowers users
