Schneider Electric Joins John Deere Supply Base

Louisville, KY. – May 10, 2013 – Schneider Electric, a global leader in sustainability services and energy management, has been chosen to supply its online sustainability platform, Resource Advisor™, to John Deere.

“We are thrilled to partner with the team at John Deere – one of the truly great brands in the world,” said Mike Fraser, Vice President of Sustainability Services Development for Schneider Electric. “John Deere conducted a highly competitive and technical search for the right global partner, and it was incredibly rewarding for our team to be awarded their business. Our people and technology are now combining to deliver some very innovative solutions for Deere, and our company is honored to have that opportunity.”

Resource Advisor, Schneider Electric’s enterprise-level StruxureWare software application, provides secure access to the data, reports and summaries that drive corporate sustainability and energy programs. Resource Advisor combines quality assurance and data capture capabilities into one energy and carbon management solution. Enterprises that depend on audited and verified data that other software or internal spreadsheets can’t guarantee appreciate Resource Advisor’s uncompromising approach to data accuracy.

About Schneider Electric

As a global specialist in energy management with operations in more than 100 countries, Schneider Electric offers integrated solutions across multiple market segments, including leadership positions in Utilities & Infrastructures, Industries & Machine Manufacturers, Non-residential Buildings, Data Centers & Networks and Residential. Focused on making energy safe, reliable, efficient, productive and green, the company’s 140,000 plus employees achieved sales of about 30.8 billion US dollars (24 billion Euros) in 2012, through an active commitment to help individuals and organizations make the most of their energy.
