Y-cam Solutions announces integration with ASUSTOR

LONDON, UK – Tuesday 14th May 2013 – Award-winning British wireless camera specialist, [Y-cam Solutions Ltd](#), the leading provider of affordable and easy-to-use security cameras, announced today that it has collaborated with ASUSTOR Inc, a leading innovator and provider of network storage solution. All ASUSTOR NAS devices will now be fully compatible with Y-cam IP cameras, providing home and small business environments with an optimal and cost-effective surveillance solution.

ASUSTOR NAS provides users with efficient and stable network storage. All ASUSTOR devices come equipped with cross-platform file sharing and multi-tasking capabilities, making it an optimal platform to build a surveillance system on. As well, all devices come preinstalled with ASUSTOR's Surveillance Center application. Users need only enable this application in App Central to receive 4 free IP camera channels with which they can quickly set up their own surveillance system. Surveillance Center features a web-based interface that allows users to easily monitor cameras, execute real-time recordings, schedule recordings, playback video and more. Presently, ASUSTOR NAS is compatible with over 100 different IP cameras models from the most popular brands. ASUSTOR's collaboration with Y-cam Solutions creates yet another reliable and sound surveillance solution for the consumer market.

“Enhancing customer experience has always been our top priority, therefore maintaining compatibility with supporting manufactures that mirror our beliefs in quality, integration and providing future-proof solutions is crucial. ASUSTOR create outstanding recording solutions and we are delighted that this partnership will add an extra dimension of support for all of our customers” explains **Commercial Director at Y-cam, Simon Carr**. *“Y-cam customers are already taking advantage of our extensive compatibility and it’s a pleasure to add the ASUSTOR range of products to this list - further enhancing our customers’ experience by combining their storage expertise and smooth surveillance software with our professional quality IP cameras”*

“We are very happy to announce this integration with Y-cam Solutions. ASUSTOR has taken advantage of its expertise in storage and surveillance management to continually expand its support for a growing number of IP camera models and brands,” said **James Su, Product Manager at ASUSTOR**. *“The ease of use and all around quality of Y-cam cameras have been widely espoused by the European media. This integration will also include the new night vision Y-cam Cube range of cameras as well as their waterproof models, which gives users greater options for 24/7 surveillance both indoor and outdoor.”*
