Converting audiences
into brand ambassadors

What is Pixe Social?

Pixe Social is a new social media marketing tool that activates a brand's online community to boost its social presence at a fraction of the investment that major social campaign initiatives require. Users take their picture, add a quote and post to your Facebook photo album and Twitter media gallery automatically. Users can then tag these photos, share with their friends and have their friends like the photos, resulting in a strong viral reach for the brand.

Solution Includes:
