Good Things Come in Small Packages

Need to scan a single aperture card image? QuickScan ACS is the lowest cost reference aperture card scanner on the market featuring an operator friendly system in a compact design.

QuickScan ACS quickly and efficiently scans single aperture cards producing the highest quality digital images available for viewing, printing or emailing. No more guessing numbers or letters. With QuickScan's incomparable 52 megapixel imaging capability, your important data is clear and legible.

QuickScan's incredibly small footprint makes it portable and available for easy, "walk up" scanning. Just pick it up and move it to the computer of your choice. QuickScan ACS works with virtually any printer making it simple to obtain a quick copy of your scan.

Scan to view, print or email. You choose. Good things do come in small packages.
