

SIP Trunking Services for Carriers and Service Providers

Dialtel's [SIP Trunking Service](#) gives you 24/7 Real Time Access to your CDR's, Balance, and Spending Reports. You can add funds as well as keep a close eye on all your account activities.

Dialtel also offers 3 different products for SIP Trunking. There are:

- Conversational Rate Decks
- Restricted Dialer Rate Decks
- Unrestricted Dialer Rate Decks

Conversational Rate Decks (Non-Dialer)

Conversational Rate Decks consists of carriers that require normal longer duration traffic and higher ASR's in order to obtain insanely low rates from them. These are the lowest rates you can find on the market. The reason for this is due to the fact that this traffic profile will better utilize the carriers resources and thus the carrier will reward you with the lowest rates possible.

Restricted Dialer Rate Decks

Restricted rate plans require that no more than 10% of the total traffic being sent to our switches is 6 seconds or less. We offer both a flat rate and an NPA-NXX rate plan for our restricted rate plans. Restricted rate plans have a blend of conversational and dialer traffic carriers. This is the most aggressive rate plan for pricing and quality.

Unrestricted Dialer Rate Decks

Unrestricted Rate Plans have no specific requirements. We offer both a flat rate and an NPA-NXX rate plan for our unrestricted rate plans. Unrestricted rate plans have only dialer approved carriers. This is not as aggressive in pricing and quality.

Our goal is to help you save money on your existing traffic. If we cannot do that then we should potentially buy traffic from you. We take carrier relations very seriously and we invite you to reach out and [contact us to get the ball rolling!](#)
