OrangeFS is Now Available on AWS Marketplace, Taking Full Advantage of Provisioned IOPS Performance

OrangeFS makes its initial entry into the Cloud, debuting two offerings in AWS Marketplace: OrangeFS High Performance Cloud Storage - Community and OrangeFS High Performance Cloud Storage - Advanced (Provisioned IOPS).

Clemson, SC—Today Omnibond announces the availability of OrangeFS on AWS Marketplace.

The availability of OrangeFS on AWS Marketplace offers customers the simplicity of Running Big Data, HPC and other high-performance and data-intensive applications on AWS. With the ease of 1-Click Launch for a Single Instance (1.28TB) or advanced options to leverage the AWS Marketplace OrangeFS AMIs in 4-Instance (5TB), 8-Instance (10TB) or 16-Instance (20TB) configurations, customers can build High Performing Cloud File Systems for demanding I/O applications in minutes.

OrangeFS on AWS Marketplace will be a new and exciting offering for industries that rely on HPC and Big Data Applications, including Research, Genomics, Seismic, Media and Entertainment, and Finance.

“We are excited to have OrangeFS as part of the AWS Marketplace,” said Amy Cannon, Director of Sales and Business Development at Omnibond, “and look forward to providing High Performing Cloud storage to many customers with demanding applications.”

“OrangeFS has always been easy to install. Now with the AWS Marketplace offerings, it all happens in minutes,” said Larissa Whitten, Manager of Support at Omnibond. “Additionally, OrangeFS continues to be backed by top-notch, dedicated support and development teams.”

The two OrangeFS AWS Marketplace offerings are:

OrangeFS High Performance Cloud Storage - Community, available at:

<https://aws.amazon.com/marketplace/pp/B00CO78Q5I>

OrangeFS High Performance Cloud Storage - Advanced (Provisioned IOPS), with the consistent performance of Provisioned IOPS and Advanced support from Omnibond, available at:

<https://aws.amazon.com/marketplace/pp/B00CO78Q4O>

About OrangeFS

OrangeFS is the next evolution in Parallel Virtual File Systems, designed for High Performance Computing (HPC), Big Data and Data Intensive Applications.
