MACTECH OFFSHORE PORTABLE MACHINING SOLUTIONS

## Subsea and Toplevel Multi-String Casing and Structure Cutting

### Diamond Wire Saw Features

- Use for cutting multi-string casing, structures, and any large, heavy material. All models can cut in any orientation.
- Models available to cut 4-1/2 to 102 inch pipe and structures.
- Rigid frames makes repeatability and back-cutting easier and more accurate.
- Powerful drives cut through the toughest steel and aggregates, with less hang-ups.
- Compact and lightweight designs takes less deck space and reduces excavation for BML cuts.
- Continuous loop diamond wire resists breaking, makes multiple cuts with a single wire. Cuts faster and lasts longer than electroplated/sintered wire.

*DWS-16co Cut-off Saw*

**Mactech offers a range of Diamond Wire Saws for subsea and topside cutting** of a variety of materials and projects. Ideal for cutting multi-string applications or heavy wall legs and cross members. Typical uses include offshore decommissioning, and subsea or topside maintenance. The compact and robust design creates an ideal cutting environment, reducing setup, installation, and removal time – saving you time and money.

Find the saw you need knowing Mactech diamond wire saws are easily customized and adaptable to specific project needs. Our versatile range includes the ultra-compact and lightweight DWS-16co, to the large diameter capacity DWS-102i. The unique DWS-40a articulating diamond wire saw is designed for below-the-mudline or low clearance cuts. ROV compatibility allows for deepwater cutting and maintenance. All of Mactech's Diamond Wire Saws are designed to give you maximum cutting range flexibility, small footprint and reliable operation.
