Table of contents

- **Product overview**
- **Illustrative contents**

The increasing complexity of the outsourcing market has amplified the risk exposure for companies

Factors driving increased risk

Vendor and model proliferation Multiple service providers and business models

Large span of functions Typically combination of many IT, BPO and some KPO services

Increasing scope Significant proportion of operations now in low cost locations

Global delivery chain Services often delivered from multiple locations with diverse risk footprint

Dynamic economies Most delivery locations are emerging economies going through rapid change

Examples of risks

Regulatory risk

Ensuring compliance with regulatory guidelines in source and destination countries across service providers

Business case risk

Managing wage inflation without affecting quality of service

Performance risk

Managing quality of service delivery, attrition, knowledge retention

Data security and intellectual property risk

Implementing measures to safeguard data and intellectual property

Concentration risk

Business continuity risk

Currency risk

....

Most large companies have capabilities in global risk management. However, the level and type of risk exposure that is emerging from the globalization of services is unprecedented

Sourcing leaders are being asked to manage risks associated with global sourcing and support the delivery of transformational results

Key decisions that Sourcing managers need to support

- Comparison with peers
