

Dear Colleague,

In a successful law practice things can get pretty hectic, and before you know it you have less and less time for things outside of just working. Worse, have you ever experienced a case where on the surface it seemed to meet all the requirements, but later turned out that it really didn't? In the meantime, you've spent a good chunk of time and money to figure that out which means depriving other cases of your resources. Well, this is exactly why you need me! I want to help you leverage your time and resources.

As a busy law professional, it only makes sense that your time, skills, and education in the law are focused on these types of issues as they pertain to a case. As a Certified Legal Nurse Consultant with over 20 years of experience in nursing, I can help you leverage your time when dealing with the medical or nursing issues. This will free up more time for you to focus on the legal issues, or to do other things that are important to you.

These are just some of the areas where I would be able to provide support:

- Screen or investigate cases for merit
- Determine adherences to and deviations from the standard of care
- Develop written reports for use as a study tool
- Locate expert witnesses
- Attend depositions
- Utilize the LexisNexis® CaseMap® Suite of software to organize the case

As a Veteran-owned small business, I also know what it means to serve, collaborate, and do my best work. I am currently seeking new clients to benefit from the services I can provide, and do my best work with. Are you ready to enhance your success? Do you want to use your time and money more effectively? Do you want to have more time for other things in life too? If so, let's get connected so I can get to work in helping you do so.

If you have any questions or need my services immediately, call me at 301-250-0830 or email me at [susan@topnotchlnc.com](mailto:susan@topnotchlnc.com). Thank you for your interest in TopNotch Legal Nurse Consulting, LLC! I look forward to making your life a bit more simple, and enriched.

Very truly yours,

Susan Bailey MSN RN-BC CLNC
