'I have received nothing but first class service from these guys and I appreciate all the extra care and attention i recieved.'

Abayo O. 1/12/2011
Rancho Cucamonga, CA

'My sister recommended you guys and i could not be happier. Thanks for all the great work'

Bill T. 4/2/2011
Upland, CA

There are quite a few local computer services out there, but Computer Solutions is the most professional by far. These guys aren't the garage geeks, they're the real business oriented deal!

David cleaned my laptop to speed it up. He also recommended adding memory because it needs 2G Ram to match windows 7. When he added the extra memory, it went even faster. He was right. I wanted to install a Blue Ray DVD. He advised me against it because the graphic card and the mother board cannot be changed to this. He deleted unnecessary programs added Ccleaner and brought my Laptop to A1 condition.

I went to computer solutions for my personal pc needs, while talking to one of the techs, I found out they did business networks, backups, manage systems. I signed up my business and can't be happier. One less headache. They even do security systems
