

# BioTechniques 2013

## VIRTUAL SYMPOSIUM

# Exploring the Modern Lab

Wed. Oct. 2, 2013 • 8:30 AM EDT – 5:30 PM EDT

The 2013 *BioTechniques* Virtual Symposium will celebrate the creativity and imagination behind today's most innovative methods and techniques. Through a wide range of talks, posters, workshops, and special keynote addresses, learn what is driving research in the modern lab.

 **FREE Registration Open Now: [www.BioTechniques.com/VS1](http://www.BioTechniques.com/VS1)**

### Symposium Agenda:

#### Morning

##### **Session 1: Advancing Molecular Biology**

Session topics: • Cloning / Mutagenesis • Analysis of Gene Regulation

##### ***BioTechniques 30th Anniversary Lecture***

Presented by: Robert Langer, Sc.D.,  
Massachusetts Institute of Technology

##### **Session 2: PCR in 2013**

Session topics: • qPCR • Multiplex PCR  
• Digital PCR

#### Afternoon

##### **Session 3: Understanding Modern Biochemistry**

Session topics: • Protein Isolation • Protein Analysis  
• Protein Structure

##### **Session 4: Modern Cellular Imaging**

Session topics: • Light Microscopy • Fluorescent Probes and Proteins • High-content Imaging

##### **Special Workshop on Plastic Labware Leaching**

Presented by: Eppendorf

### Virtual Symposium Features:

- Sessions on the latest advances in molecular biology, PCR, modern biochemistry, and cellular imaging
- A featured lecture on gene delivery and a special workshop on plastic labware leaching
- **NO COST** to register and attend and **NO TRAVEL COSTS**
- Networking opportunities with speakers, attendees, and sponsors
- Live Q&A sessions with presenters
- A virtual exhibit hall and poster hall

Sponsored in part by:

 eppendorf

 **ORIGENE**  
Your Gene Company

 **Mirus**  
The Transfection Experts

 **CHROMA**

 **ESSEN**  
BIO SCIENCE

 **Roche**
