

# USA WALL

## U-ltra S-imple A-ffordable

**Our USA Wall provides climbing wall operators with an economical alternative to our premium seamless High Performance system.**

The USA Wall is a modular seamed system of a poly-resin texture applied over ¾-inch plywood panels. Supported by a steel framing system, the modular panels are quickly installed and can be replaced as needed. A high density of t-nuts (3 per square foot) allows for extensive route setting options.

Design options for the USA Wall are limitless and the panels are available in a wide range of colors. Our industry-leading design team will work with you to create the USA Wall system that best meets the needs of your facility and your climbers.
