**ETi Solid State Lighting Inc. Announces DesignLights Consortium® Qualified Backlit Troffers**

*ETi's Lightweight, Easy Mount Design Offered in Two Sizes*

Cleveland, OH, -- May 29, 2013 – ETi Solid State Lighting Inc., an emerging leader in the LED lighting industry, announced their *2' x 2' and 1' x 4' backlit LED troffers* are listed on the DesignLights Consortium® Qualified Product List (DLC QPL). ETi's backlit LED recessed troffers are a brighter, more efficient option to replace the standard fluorescent lay-in troffers used in recessed ceiling lights. Both luminaires offer a slim, low profile look while providing the benefits of lighter weight and an easy mount design.

The ETi Solid State Lighting 50 Watt, 3400 Lumen, CRI 83, *2' x 2' Backlit Troffer (Part number 54301141)*, with its soft frosted lens and architectural matte white trim, is ideal for a wide range of applications. The 46 Watt, 3200 Lumen, CRI 83, *1' x 4' Backlit Troffer (Part number 54302141)* is offered by ETi Solid State Lighting with same sleek, frosted design as the *2' x 2'*, offers convenient recessed options as well. Both fixtures have a color temp of 4000K and are supplied with a 100-277v driver. UL listed for use in damp locations and RoHS compliant, both backlit troffers are perfect for residential, office, retail, restaurant, school, hospital, hotel/motel locations, and other commercial installations.

“We are pleased to announce that our backlit LED troffers are DesignLights Consortium Qualified products.”, said David Rubin, President of The Americas for ETi Solid State Lighting Inc. “ETi supports the organization’s goal to ensure high-quality, energy-efficient lighting design becomes commonplace in all lighting installations. With ETi’s planned product development, our customers will see a myriad of high efficiency LED lighting products introduced to the market this year.”
