Entrada Publishes Client Testimonial, Details Improved Physician Productivity and Workflow After Adopting Digital Dictation

FEATURING THE PALM BEACH ORTHOPAEDIC INSTITUTE, THE CLIENT TESTIMONIAL VIDEO PROVIDES INSIGHT ON HOW ENTRADA'S MOBILE APPLICATION REINSTATED PEACE OF MIND FOR BOTH PHYSICIANS AND STAFF

NASHVILLE, Tenn., June 4, 2013 - Today [Entrada](#) released its latest client testimonial video, detailing the experience of Palm Beach Orthopaedic Institute, which utilizes Entrada's digital dictation solution on a variety of mobile devices, such as iPhones and iPads. Entrada recently announced its new client testimonial video series, which features a number of success stories from its growing roster of clients.

Before adopting Entrada, [Palm Beach Orthopaedic Institute](#) was on a path to meeting Meaningful Use Stage One criteria, but the transition from paper to digital records was a challenge for both physicians and staff. After trying several different solutions and workarounds, each with minimal success, the physicians at PBOI adopted Entrada in April 2011. Within days, the orthopaedic surgeons were citing the flexibility and ease-of-use of Entrada's [mobile application](#).

"It's simple. It's dependable. Not only has Entrada made a difference on our bottom line, it's actually an enjoyable application to use."

- Dr. Ryan Simovitch, Orthopaedic Surgeon at PBOI.

The physicians, staff and management team at PBOI attest that the integration between their practice management system, Entrada, and their EHR alone has dramatically improved their documentation process by reducing the manual tasks and chances for human error while also speeding up both procedure approval and chart completion. The physicians have also seen a dramatic improvement in workflow that has allowed them to spend less time documenting and more time seeing patients and performing procedures.

"Entrada has added the next level of automation for our physicians and staff to operate more quickly and efficiently. Our providers are confident in the fact their dictated notes will be returned the same day."

- Brian Bizub, CEO at the Palm Beach Orthopaedic Institute

Entrada believes physician deserve to dictate on their own terms, and with its deep integration with a handful of industry-leading electronic health record vendors, clients such as the Palm Beach Orthopaedic Institute are seeing improved productivity, faster turnaround, and the peace of mind that providers can finally leave the office with their last patient.

About Entrada

Entrada protects physician productivity before, during and after the transition to an EHR system. Because every provider's workflow is different, Entrada's cloud-based voice engine enables physicians to dictate on their terms, whether through a digital dictation and backend editing workflow or through real-time, front-end speech-to-text for those who wish to self-edit. Whether dictating from a worklist on a mobile device (iOS or Android) or from directly within the EHR with a speechmike, Entrada provides a fast, easy way to document clinical information and makes EHRs much easier to adopt and use.
