

CELERGEN – Swiss Cell Therapy

How cell therapy has dramatically improved the personal lives of doctors, their patients and a celebrity fitness trainer.

IT WAS EARLY 2013 WHEN DR. BRUCE Lowell, a New York internist, first began recommending Celergen for patients seeking relief from a variety of ailments, including chronic pain, depression and a lack of vitality, energy and mental focus. Within weeks almost all of them reported significant improvements.

"The response time was much quicker than I would

have imagined, sometimes as little as two weeks," says Lowell, of the Lowell Health and Longevity Center in Great Neck, New York.

Celergen's most notable attribute, according to Dr. Lowell: It benefits different patients in widely different ways.

"Some of my male patients reported improved libido and sexual performance," says Lowell, "while some said it helped reduce joint pain and give them a better night's

sleep. There were others who couldn't quite put a finger on exactly how they felt better, just that they had an overall improved sense of well being."

So impressed by Celergen was Dr. Lowell that he began taking it himself. After just a couple of weeks, he experienced a noticeable increase in energy, so much so that he felt heightened vitality throughout the day and no longer had to depend on a jolt of caffeine to combat the "four o'clock slump."

"I was, admittedly, something of a Doubting Thomas at first," says Dr. Lowell. "But having seen first-hand proof of what Celergen can do, in both myself and my patients, I now know that something remarkable is definitely going on."

HOW CELERGEN WORKS TO FIGHT AGING

Celergen's effectiveness stems from innovative advancements in the field of marine cell therapy, taking extracts from certain deep-sea marine creatures to offset the effects of premature aging, fight age-related degenerative diseases, and boost human immune systems. Based on a unique Swiss Cold-Process DNA Extraction Technology that gathers the proteins essential to the supplement, Celergen delivers these proteins in capsule form so that they easily enter the blood stream and the brain, triggering enhanced cell activity.

Celergen binds these marine cell proteins with Peptide

E Collagen, which reinforces skin elasticity, and Hydro MN Peptide, which plays a critical role in the rejuvenation of cartilage. The immediate dividend: Healthier looking skin and a reduction of chronic joint pain. Doctors report that Celergen also goes to work on the vascular system, which can reduce the rise in blood sugar after meals and forestall certain conditions like Type II diabetes.

"What is special about Celergen is that it is not a pharmaceutical and yet it truly works on a cellular level to promote regeneration and can slow, if not reverse, the aging process."

-- DR. KENNETH ORBECK

As more and more of their patients take Celergen and report beneficial results, doctors have begun to recommend it for an increasing variety of ailments. The results are often subtle at first, with other people noticing changes before those using Celergen. After just a few weeks of taking Celergen, Dr. Lowell says friends and colleagues began to quietly inquire if he had recently undergone cosmetic surgery or Botox treatments.

"But the real kicker was when my longtime hairdresser asked, in something of a huff, if I had gone to someone

Why Doctors Personally Use Celergen

MOOD ELEVATION

"My overall mood and outlook have definitely improved. I feel more energized and focused."

-- Dr. Nina Svino, Esthetic and Lifestyle Dentistry, Seattle, WA

"My mind is clearer and my memory sharper. Celergen is a superfood for my cells."

-- Dr. Mercedes Schaafsma, Miami Anti-Aging and Metabolic Institute, Miami, FL

STRESS

"At first I didn't notice anything. Then after about 3 months I could really experience the difference. We do a heart rate variability test in our office that reflects the health of the nervous system. Before I started taking Celergen, my test showed a stressed nervous system. Now, after just four months, it is balanced and vital. Celergen has really helped my body."

-- Dr. David I. Minkoff, LifeWorks Wellness Center, Clearwater, FL

OVERALL WELL-BEING

"My patients who start Celergen believe that it is helping them in a variety of ways, from hair growth and radiant skin texture to weight loss, increased energy, and relief from joint pain. Although patients' experiences have varied, they are not willing to go back to a life without Celergen."

-- Dr. Chong Kim, Anti-Aging Medicine Chong Kim MD, Torrance, CA

else to dye my hair," says Lowell. "He noticed before I did that my roots were returning to their original dark color."

WITH MEN IN MIND: ENERGY, FOCUS, IMPROVED LIBIDO

Dr. Kenneth Orbeck, of BodyLogicMD in Greenville, SC, has dedicated his practice to helping patients find relief from adrenal fatigue and thyroid disorders, as well as addressing hormonal imbalances, such as menopause and andropause (male menopause.) Many of those seeking his help are middle-aged men plagued by maladies that stem from athletic pursuits in their early years or more recent aches and pains from overexertion.

"They come in complaining about knee pain or joint swelling," says Orbeck. "After a short regimen of Celergen, the pain often disappears altogether and the afflicted area shows improved range of motion and strength."

One of Dr. Orbeck's patients, a 78-year-old man, had no specific ailments, but expressed a simple desire to continue his good health as long as possible.

"He told me that he felt great and that he just wanted to keep feeling great. He said that on a scale of one to ten, he considered himself a ten," says Dr. Orbeck, who recommended Celergen. "When he returned a few weeks later, he said 'Doctor, if I was a 10 before, then I'm a 15 now.' He achieved a level of vitality and an increased libido

that he thought it would be impossible to ever regain."

In his practice, Dr. Orbeck follows a guiding philosophy that says the human body is fully capable of healing itself given the proper tools.

"By that I do not mean prescribing endless pharmaceuticals that merely mask the problem," says Orbeck. "What is special about Celergen is that it is not a pharmaceutical and yet it truly works on a cellular level to promote regeneration and can slow, if not

reverse, the aging process. It provides the bricks and mortar for the cells to regenerate. And coupled with a program of hormonal optimization, it gives me the perfect one-two punch."

FASTER SPORTS RECOVERY, MORE PLEASURE

A fitness expert with more than 25 years in the wellness industry, Michael George has worked with a long list of celebrities and professional athletes, including Meg Ryan, Reese Witherspoon, Toby Maguire, Dennis Quaid and professional boxer Fernando Vargas. George, author of *Body Express Makeover: Trim and Sculpt Your Body in Less than Six Weeks*, says he has recommended numerous supplements to his clients over the years, "everything from sprays to pills and ointments," but was never wholly satisfied with the results.

All that changed after he read about Celergen, researched it further and determined that the "science behind it made absolute sense because it worked directly on a cellular level." He began taking Celergen at the end of 2012.

"I am very body aware and like to believe that I'm in peak health. I didn't think I would notice any improvements at all, but that was not the case," says George. "Within two weeks, the tendonitis in my elbow disappeared. It was something that I had given up hope of ever getting rid of and Celergen made it completely go away."

George also noticed a dramatic improvement in his ability to recover after grueling physical activity.

"At my age, I had grown accustomed to having to mix up my workout regimen to allow for recovery from one day to the next," says George, who is 50. "Now I can do a full-blown hour-long workout, come back the next day and do it all over again."

As for his libido, George says Celergen "has me

"Celergen affects different patients in different ways. Some of my male patients reported improved libido and sexual performance, while some said it helped reduce joint pain and give them a better night's sleep."

-- DR. BRUCE LOWELL

believing that I'm a 20-year-old. It has definitely increased my performance."

He now suggests that his clients reconsider all the supplements they take and reduce the long list to only Celergen.

"It is really the only product out there that is capable of addressing a multitude of areas," says George.

Why Doctors Personally Use Celergen

ENERGY AND VITALITY

"At 74, after bypass surgery, I figured things might never get better. Enter Celergen! I no longer wear a back brace, I work 14 hours a day, and I never complain of being tired."

-- Dr. Glen Guillet, Anti-Aging CellTherapy of Texas, Beaumont, TX

"It has increased my metabolism, helped to shed the last few pounds that I wanted to lose, and I no longer have jet lag. Ever."

-- Dr. Rene Dell'Acqua, Dell'Acqua Dental Studio, Palm Desert, CA

OVERALL WELL-BEING

"I have personally experienced increased energy and my patients are reporting a better sense of wellbeing, mental clarity and less anxiety."

-- Dr. David Manganaro, Manhattan Advanced Medicine, New York, NY

"I sleep much better now and wake up with renewed energy. I believe Celergen is the best natural supplement enhancing the quality of life."

-- Dr. Michael Hytros, founder, The Anti-Aging and Bariatric Clinic, Chicago, IL

CHRONIC PAIN

"I have been on Celergen for about three months and have suffered chronic pain to my ankle from a fall. Now I am walking without a limp and have decreased the pain and stiffness. I no longer need to take NSAIDS."

-- Dr. Angelo Baccellieri, Westchester Wellness Medicine, Harrison, NY

CELERGEN

A New Era in Rejuvenating the Human Body

FIGHTS DEPRESSION, ELEVATES MOODS, IMPROVES LIVES

According to recent estimates by the World Health Organization, as many as 120 million people worldwide suffer from some form of depression. While anti-depressants are typically the go-to course of dealing with such mood disorders, doctors are discovering that Celergen offers tangible results in this area, too.

One of Dr. Lowell's patients, a former schoolteacher, began taking Celergen and, after three weeks that brought significant improvement for her depression, she was able to stop taking her anti-depression medication.

"Another patient had just endured the recent loss of a loved one. She didn't want to get out of bed in the morning and refused to take anti-depressants. With Celergen, she was back to being herself within a month's time," says Lowell. "And yet another patient told me that, in addition to warding off depression, Celergen help improved his blurry eyesight."

Results like that are readily explained, says Dr. Orbeck, since Celergen, working on a cellular level, helps "reduce inflammation, which in turn improves neural transmitter response."

"This all combines to reduce stress and anxiety, leaving patients with more energy, more acute focus and a general all-around sense of well being," says Dr. Orbeck.

For his part, Dr. Lowell says his recent experience with Celergen has convinced him that its benefits are only starting to be understood.

"I think Celergen marks the beginning of a new era in how we approach rejuvenating the human body," he says. "The possibilities are endless and exciting."
