About

LGL is an independent and international consultancy, known for being expert in future technologies and tomorrow's business. With more than 20 years of experiences in developing products from scratch to world market leader, and a powerful network of specialists in the background LGL helps its clients to build better products and services for a winning business.

London's Artificial Intelligence Futurists

is an meetup initiative of LGL focusing on debating or even developing Artificial (General) Intelligence/Human Level Machine Intelligence, Personal Robots, Intelligent Agents, Intelligence Theory itself, etc. and discussing its impact on the future. Join the debate, share your opinion, and shape the future at meetup.com/London-Artificial-Intelligence-Futurists/
