

SAVORTEX™

Smart Drying

PRESS RELEASE

DATE: 12th June 2013
REF: SAVPR12062013

SAVORTEX join BIFM as a corporate member

For free and immediate distribution

SAVORTEX has been accepted by the British Institute of Facilities Management (BIFM) as a corporate member.

SAVORTEX, award winning British designer and suppliers of [energy efficient hand dryers](#) has joined The British Institute of Facilities Management (BIFM), the professional body for Facilities Management (FM), as a corporate member. BIFM delivers a range of services and benefits, including information, qualifications, continuing professional development, training and networking for over 13,000 individual and corporate members.

Syed Ahmed, CEO SAVORTEX said:

"It's been an extraordinary week, firstly our Vortex EcoSmart dryer is been approved by the ECA scheme and has been successfully added to their Energy Technology List for meeting their specific energy saving eligibility criteria, plus this announcement on our corporate membership with BIFM. These are fantastic platforms for us to leverage and align with our thought-leading strategy in the

FM marketplace. Challenging trading conditions, means it is more important than ever, for clients to realise cost savings through sustainable procurement and hit their CSR targets. SAVORTEX has introduced a number of innovative purchasing models to help improve profitability and boost the bottom line, by offsetting costs from the energy saved by installing our hand drying products”.

He went on to say:

“BIFM remains constant in continuing to raise the profile of FM to keep it on the business agenda and brings together the facilities management community. As a Corporate Member we are demonstrating our commitment to the FM profession by delivering FM excellence”.

SAVORTEX aims to lead the industry through both innovation and the development of truly sustainable washroom products. They design and manufacture revolutionary low energy hand drying products for the global washroom sector and have brought to market the world’s first hand dryer to achieve a Guinness World Records title for its energy efficiency, drying most pairs of hand’s using just 30 KJ of energy.
