

## Early Intervention

### *Did you know?*

Most families who have a child on the autism spectrum can receive therapy with us as an insurance covered service. We accept Capital Health Plan, BCBS, Aetna, Cigna, United HealthCare, and several other popular plans.

Florida Autism Center's Early Intervention Program is geared toward children ages 1 - 6 who are in need of intensive instruction and individual attention to reach developmental milestones.

We teach language, social skills, pre-academics (Kindergarten readiness skills), self-care / daily living skills (yes, including potty training!), basic following directions, and just about anything else you can think of!

Come learn with us in a fun, friendly, AND scientific environment. We are an approved practicum site for several university programs.
