Cantilever Racks – For Wide Loads

- Cantilever Racks allow full width access!

**Industrial
Strength**

Light Duty

How To Order A Cantilever Rack...

- How to decide spreader length..
- --The total overhang should equal 1 divided by the number of uprights used x the length of the product..
- --So , a 12 foot load being supported by 3 uprights can have a total overhang of $\frac{1}{3} \times 12 = 4$ feet , or 2 feet on either side
- The only other thing to do is order arms and uprights

Cable Reel Racks

- Cable reel racks are designed very much like pallet racks , but have a triangular upright. The orange beams shown are pallet rack beams!

Bulk Warehouse Racks

Boltless Wide Span Shelving

- Less expensive than the HD Storage Racks , but still with respectable capacity. Some call these Rivet Racks

Heavy Duty Storage Racks

- Looks like Pallet Rack – but is intended for hand loading and unloading

Tel 800-209-8798

Tire Racks

- Specifically designed to store tires.
- Tire specialty stores, car dealerships, and any place that has tire inventory uses these racks!
