### **L.A. NOVELIST DEVIN MORGAN INTRODUCES BRAND NEW GENRE OF VAMPIRE LORE – THE IMMORTALS**

*Morgan's books are among Amazon's top rated romance novels.*

**Los Angeles, Ca.** – Devin Morgan is the most exciting new novelist out of Los Angeles specializing in vampire lore. Her first book, ARIS RETURNS, of The Infinity Diaries series (BroadLit Paperback \$14.99), has been listed among Amazon's top-rated books – alongside those by veteran and popular novelists like Nora Roberts, Danielle Steele, and John Grisham.

Set in modern day Chicago and London's underground Catacombs, Morgan's characters introduce readers to a new vampire lore that sheds light on the creation of these dark creatures within their own utopian society. The series is based on psychologist Sarah Hagan's love for Aris, a new bloodline of vampire with a centuries long past. But, before Sarah can immerse herself in her newfound love, she must overcome obstacles in her own modern-day world, as well as Aris' underground world of the Catacombs and in the mountains of Spain where a vampire war threatens to erupt.

"Every adult woman needs her own Edward Cullen," says author Devin Morgan about her new adult vampire series, which she says was inspired by all the "glorious and good teen vampire novels in the market." A history buff, Morgan digs deep into her knowledge of the past to bring her audience real and imagined stories of these intriguing characters in an adventure that spans oceans, generations and dimensions.

Morgan's books present a twenty-first century setting that blends Tudor history and modern day societies in a twist that will surprise readers.
