

# EMA-Transact

M&A professionals use [EMA-Transact](#) to improve target management and deal-making agility. Our Deal Management solution provides the governance and sophisticated features to help improve deal flow management and agility. EMA-Transact offers real-time monitoring of all pre-close events, tasks, internal document management and sophisticated collaborative tools to keep your target management projects on schedule.

The challenge M&A professionals regularly face is selecting the right acquisition and management process to implement a strategy that provides the type of risk-return profile or corporate advantage they are seeking. Even the best-planned M&A deals can get sidetracked or lose traction due to outdated workflows and project process tools, or using non-integrated applications.

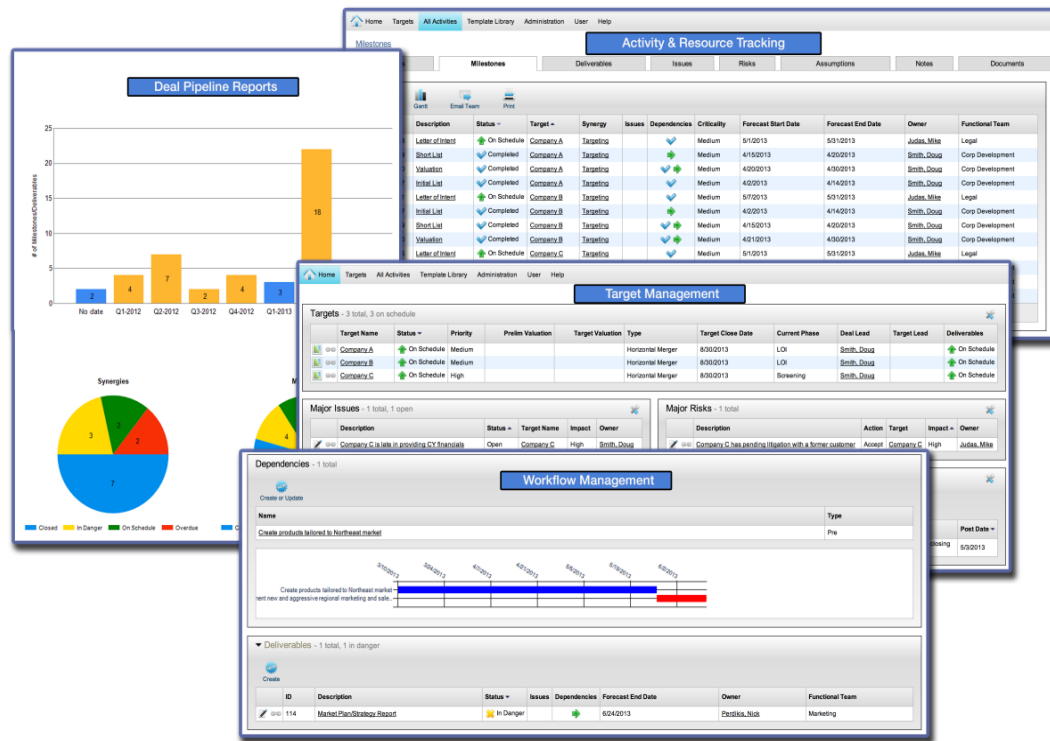

Selecting the right M&A management solution is critical to leverage each deal opportunity and maximize the anticipated strategic benefits. EMA-Transact will help you meet your objectives.

## DEAL MANAGEMENT SMART

# Deal Management Solution
