- Tour guides relay the ancient tales of Native American spirits and legends as well as inspiring true stories about some of the noteworthy tribal members who made the Dells their home for centuries.
- Guides describe the Dells’ prehistoric past, how sand from an ancient inland sea was formed into huge rocky cliffs, then cut and shaped by the power of a melting glacier. The amazing rock formations include Demon's Anvil, The Navy Yard, Steamboat Rock and Black Hawk's Profile.
- Passengers will also hear the historical accounts of the lumber raftsmen of the early to mid-1800s, including how they survived the treacherous waters of the Wisconsin River in the Dells region.
