Provade Launches New Whitepaper, “Quarterly Business Reviews: Using Business Intelligence to Improve Efficiency”

White paper outlines the importance of using trustworthy data from a Vendor Management System to drive meaningful QBR discussions

MILWAUKEE, June 25, 2013 – [Provade, Inc.](#), an industry leader in enterprise [Vendor Management System \(VMS\)](#) development for global contingent workforce spend management, has launched a new white paper entitled “[Quarterly Business Reviews: Using Business Intelligence to Improve Efficiency](#).” The white paper outlines the key ways companies can utilize business intelligence (BI) from their VMS to drive goal setting and strategy development and deliver the best results for their clients.

The quarterly business review (QBR) is essential to the contingent workforce management vendor/client relationship. These sessions help improve a company’s relationship with the client by focusing discussion on meaningful results. The white paper highlights how a company’s VMS provides dependable, concrete data to drive discussions.

“This white paper helps people understand the value BI from a VMS brings to the QBR process,” said Edward Jackson, President of Provade. “By reinforcing that your data was pulled directly from the system of record, your clients will come to see it – and the plans you develop from it – as credible and trustworthy.”

To download this white paper in its entirety, please visit <http://www.provade.com/quarterly-business-reviews-whitepaper/>.
