Cambridge, UK (9 June 2013) – *CambridgeIP announces the launch of the world's first global patent search portal with mobile access, DiscoverIP.*

An industry first, the launch of DiscoverIP and its mobile application will provide seamless mobile access to the global patent library for innovators, industry experts, patent agents and others around the world.

CambridgeIP has developed a free iPhone and iPad App to DiscoverIP's global patent collection. The App is available for download on the iTunes store, and CambridgeIP will soon launch DiscoverIP Apps for Android and other mobile platforms.

DiscoverIP is by experts for experts, coming from the patent search experts at CambridgeIP. DiscoverIP hosts over 100 million patent and non-patent records from around the world, making it one of the world's most comprehensive patent search portals.

Quentin Tannock (Chairman, CambridgeIP) said

> *"An important part of CambridgeIP's mission is to enhance access to the information and resources relevant to innovation and to technology development. We are delighted to contribute by facilitating mobile access to the global technology library represented by the over 100 million documents in our DiscoverIP database".*

DiscoverIP

DiscoverIP is a leading online Patent search and analysis portal
