

apps Freedom™
Driving Business Productivity™

ACCELERATE AND EXTEND THE BENEFITS OF ENTERPRISE MOBILITY IN JUST TWO TO FOUR WEEKS

Introducing appsFreedom™: a complete Enterprise Mobile Cloud solution (delivered as a SaaS model) to fuel your company-wide mobility strategy. Our ready-to-use **Freedom Apps** combine secure cloud computing with advanced mobile technologies to get your business users productive in SAP quickly from any mobile device. And now you can leverage our robust **Freedom Platform** – a mature cloud-based Mobile Application Development Platform – to easily design, build, deploy and manage your company's own custom apps. The solution is deployed in just two to four weeks, making appsFreedom the perfect recipe to accelerate your mobility strategy like never before.

FAST TO DEPLOY, EASY TO MANAGE

appsFreedom is pre-built and pre-integrated into SAP and requires no system configuration or development whatsoever (even with your SAP customizations in place). So whether you're rolling out our Freedom Apps, building and deploying your own custom apps – or both – appsFreedom offers a complete solution to plan, execute and manage your enterprise-wide mobility strategy.

FREEDOM APPS

Select a single app, multiple apps or app bundle from our repository of ready-to-use, pre-built and pre-integrated apps that significantly speed time-to-value and ROI.

FREEDOM PLATFORM

The patent pending “Freedom Platform” is an enterprise-grade, fully integrated mobile development and management platform that helps companies accelerate time to value and extend the mobility value proposition throughout the organization. The platform simplifies a company’s ability to design, build, deploy, manage and analyze in-house developed apps. The solution consists of three components:

- **Freedom Apps (on-device):** ready-to-use, pre-integrated apps that are deployed in a matter of days for key business functions including sales, management, procurement, HR and field services;
- **Freedom Manager (on-demand):** on-demand, multi-tenant development and management application that simplifies app development, deployment, provisioning and management; supports unlimited scalability and adoption analysis; and
- **Freedom Plugin (on-premise):** for simplified integration and execution of business rules to support a seamless rollout into any enterprise environment.

- **FAST** deployment in just two to four weeks
- **MINIMIZE IT** costs, capital budgets and skill gaps
- **ZERO SAP** development or configuration required
- **SAAS** model with simple user-based pricing
- **MATURE** cloud-based **MADP** with **ready-to-use apps**
- **SINGLE**, secure and scalable infrastructure

THE FREEDOM PLATFORM

Freedom Apps

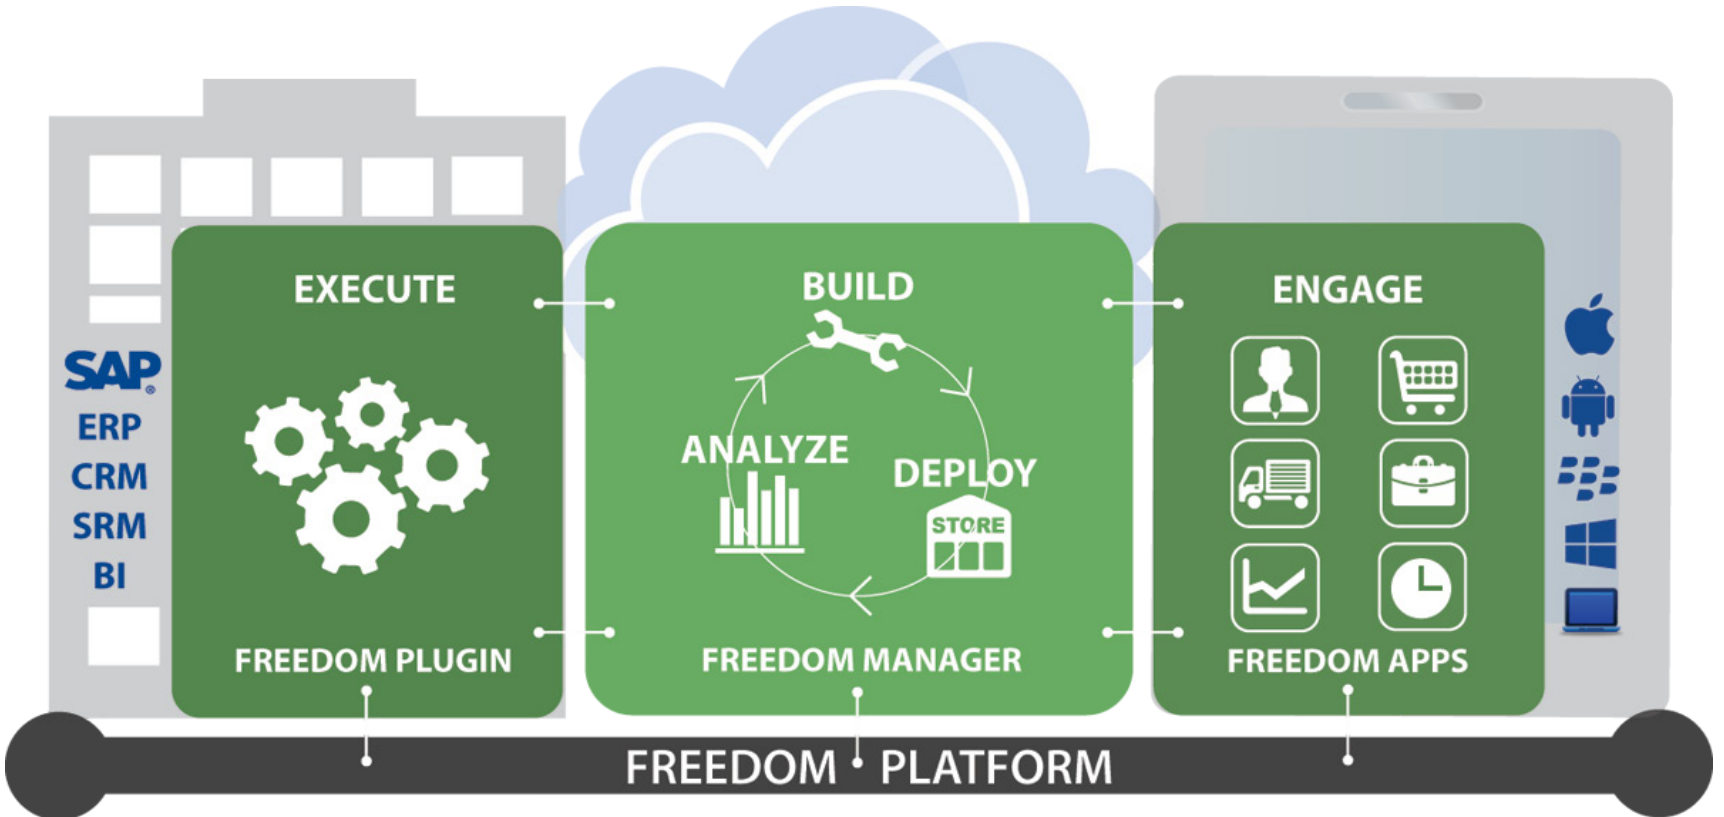

- Ready-to-use Apps
- Push Notifications
- Smart Phones, Tablets and Desktops

Freedom Manager

- Visual Design; Build Once, Run Everywhere
- Deploy and Discover via Corporate App Stores
