LAVU

full-featured
MobilePOS

Food Truck Sales Assistant

Features:

Cloud data access

- ✓ allows for real-time reporting
- ✓ remote, real-time back-end management for menu, labor, etc.
- ✓ available anywhere with an internet connection

Inventory feature

- ✓ allows you to keep track of stock and cost
- ✓ analyze reports in order to reduce waste

Offline mode

- ✓ a reliable back up in extreme situations
- ✓ eliminates any worry of your system not working due to poor internet service
- ✓ syncs when there is a connection

Email receipts

- ✓ saves the space a printer would take inside of your food truck
- ✓ assists you in going "Green!"

Set-Up:

Typically a single terminal

Mobile device for line busting
(iPad mini, iPod Touch, iPhone)

Dual-mapped printer

- ✓ save space
  use one printer for both kitchen + receipt

Active Cellular Network Connection for WiFi

Benefits:

- ✓ off-line mode
- ✓ hardware is light and compact enough to fit in the small space available inside your food truck
- ✓ cloud - real-time cloud access keeps you up to the minute about inventory, sales, etc
- ✓ marketing - Facebook integration, loyalty and gift cards etc...

Value:

- ✓ afford a full-function full-featured POS terminal and still be mobile
- ✓ line busting can increase sales - handle the rush - are people walking away when you are too busy?
