

## **AsdeqDocs® Announces Integration with MobileIron AppConnect**

### *Integration Brings AsdeqDocs' Enterprise Mobility Content Management Solution to MobileIron App Ecosystem*

San Francisco, California – July 29, 2013 – [AsdeqDocs®](#) today announced it has joined the MobileIron AppConnect ecosystem.

The integration of AsdeqDocs' next generation enterprise mobility content management solution with MobileIron AppConnect ensures users can securely and seamlessly access, work on and synchronize sensitive documents and content on their mobile devices while providing IT the policy controls it needs to secure and manage corporate data.

[MobileIron](#), the leader in security and management for mobile apps, documents, and devices, provides its AppConnect technology to third party mobile app developers. With MobileIron AppConnect apps, companies can give their employees the best third-party application experiences with apps that have been enabled with auto-configuration, data containerization, and secure tunneling to protect corporate data.

AsdeqDocs CEO David Burden said: "More and more, employees wish to use their preferred devices for work, while enterprises increasingly appreciate the advantages that 'bring your own device', or BYOD, creates. For this to be a truly win-win arrangement however requires high-level device and document security; inter-operability with existing IT systems; while also preserving an optimal user experience. AsdeqDocs' integration with the MobileIron AppConnect program delivers all these benefits, and we expect our customers will embrace this offer."

Ojas Rege, VP Strategy, MobileIron, said: "We have been working with best-of-breed app developers to create an ecosystem of critical business apps that can be secured by the MobileIron Mobile IT platform. We have been very impressed with how easily and seamlessly AsdeqDocs integrates with existing IT systems and work practices. The addition of AsdeqDocs to the AppConnect ecosystem will help our customers realize the potential of BYOD."

AsdeqDocs is a next generation enterprise mobility content management solution that enables the secure and automatic synchronization of corporate documents to and from employees' iOS and Android tablets and smartphones.

AsdeqDocs allows a user to securely access, edit, annotate, author and search for documents while mobile, delivering full access to documents on and offline.

AsdeqDocs employs military-grade encryption at all levels. It enforces document-level security and provides full on-device audit logging, allowing an administrator to determine who has accessed which documents, when, and – if they choose – from where.

The AsdeqDocs solution is installed behind the corporate firewall and directly connects a mobile user with more than 18 leading document management solutions including SharePoint, Documentum, Exchange, File Shares, OpenText, Objective, iManage, WebCenter, HP Trim and IBM Connections.
