

Sustainability

the BigVision

BigToys has been dedicated to creating environmentally friendly products since before being green was trendy. For us, it's never been a trend – it's a lifestyle. We believe in sustaining play for generations to come. Our goal is to ensure that our children, grandchildren, great grandchildren, and great, great grandchildren have clean, healthy areas in which to play.

BigToys products lead the industry in recycled content, averaging more than **70% reclaimed material** in each structure

Our decks, enclosures, and roofs are made from 100% post-consumer recycled High Density Polyethylene (HDPE) formed from milk jugs. This process has diverted more than **18 million milk jugs** from landfills since 2005!

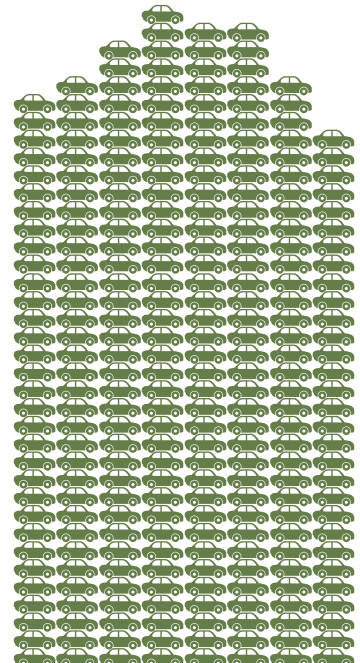

We've diverted more than **1 million pounds** of scrap metal from landfills since 2005 by using recycled metal to manufacture our metal uprights

Not only do we choose earth friendly materials, but we also implement green practices that improve the environmental sustainability of our manufacturing process. We are proud that our manufacturing facility in Fort Payne, Alabama is ISO 14001 certified. This certification specifies the requirements of our environmental management system (EMS).

1 million lbs. of scrap metal diverted from landfills is equal to about 250 cars. (Average car weights 4,000 lbs.)

14001:2004 CERTIFIED
All products made in ISO 14001 certified facility

GreenMaterials

BigToys offers the exclusive option to choose whether your structure is made from conditioned wood or recycled metal and plastic.

- Natural, organic look and feel
- 6" diameter, finger-jointed uprights
 - Utilizes more of the tree with less waste
- Ultra-smooth finish
 - Sanded surfaces and rounded edges are smooth to the touch
