DYNASTACK CHOOSES COLOGIX DALLAS INFOMART DATA CENTER TO
SUPPORT CLOUD ECOSYSTEM AND IT SERVICES

Dallas, TX – August 5, 2013 – Cologix™, a network neutral interconnection and data center company, announced today that Dynastack Inc., a Dallas based cloud ecosystems and IT services provider has chosen Cologix's Dallas INFOMART data center to house their critical mission infrastructure. Dynastack offers Cloud Desktops in its private and public cloud ecosystems as well as public or private VDI solutions allowing enterprise users to provision virtual desktops and workstations one time complete with profiles, roles, security, applications and storage, and then deploy that instance to hundreds of users in a matter of minutes.

"We primarily use local resources before bursting to the cloud when resources are required while we continually back-up both instances so it is important for us to have a data center provider supporting our mission critical infrastructure that is close to a concentration of our customers," stated Jared Rice CEO, Dynastack. "Cologix's INFOMART data center provides us with a local, flexible and secure data center environment that has the robust connectivity we need to continue growing at a rapid rate."

Cologix enables customers to grow their networks rapidly and cost-effectively by delivering flexible space, reliable power, and dense connectivity to customers in the carrier, content delivery, media, financial services and enterprise communities. Cologix's INFOMART data center is supported by a robust infrastructure that includes hot aisle containment pods, modular power distribution units and the latest in modular In-Row cooling technology. Customers have the unique ability to directly interconnect with existing customers and 30+ networks in Cologix's existing MMR at the Dallas INFOMART as well as accessing other tenants in the building.

"We continue to see strong demand in Dallas within our Cloud and Internet Solutions communities and we are pleased to welcome Dynastack to our data center," stated Rob DeVita, General Manager, Cologix Dallas. "Dynastack offers innovative cloud solutions and we look forward to supporting their infrastructure and introducing them to new customers in Dallas."
