

## Market Leader in Service Management Applications

*Port Authority Selects Alert Software to Streamline Their Project, Contract and Grant Management Processes*

Toronto, ON – August 6, 2013 **Fieldpoint Service Applications Inc.** announced today that one of the largest U.S. Port Authorities had selected Alert Software as their Project Management, Contract and Grant Management solution.

In 2012, the Port had \$38.6M worth of completed capital projects and they were working on \$35.3M on construction-in-progress projects. Project accountability was a key driver for this initiative. With several millions of Federal, State and Tax dollars being awarded, tight cost controls were required from the bid process to project delivery and on-going maintenance support.

Alert Software will unify the project management processes and aggregate job cost details throughout the project lifecycle. The project controls will comply with government auditing requirements for cost management and financial reporting. Alert Software will integrate to Microsoft Dynamics GP to provide a cohesive Project solution to the Port Authority.

“The Port Authority has several projects and infrastructure improvement jobs at any given time.” Says Rich Smart, President at Fieldpoint Service Applications. “Tracking the costs and progress of these activities is a critically important element of what they do as an organization. Alert is going to ensure that the Port has full visibility of all activities in real time.”

**Alert Software** will Streamline the Project Management Processes:

- Project Management and Project Accounting
- Contract Management – Vendor Contracts and Documentation
- Grant Management – Track Awards and Funds
- Job Costing and Project Financial Reporting

### **About Fieldpoint Service Applications Inc.:**

Fieldpoint Service Applications Inc. is a best-of-breed, service management software provider. Our unified project management and field service applications optimize the entire service lifecycle; from the initial project installation to recurring maintenance work. Our web-based tools enable organizations to run leaner, smarter and more profitable businesses.
