

## Chinavasion Reveals The Ceros Revolution Tablet With A Powerful 8000 mAh Battery and 264 PPI Display

China Android tablets are on a par with the world's best known iOS and Android devices on some of its best-known strengths according to Android tablet specialist Chinavasion.

Chinavasion put out the 9.7 inch quad core Android 4.2 Ceros recently, matching the world's best iOS and Android devices on display and battery life according to Chinavasion PR Manager Rose Li.

With an unbelievable 264PPI Retina Screen resolution, Li says the [Ceros Revolution tablet](#) will change the way that Android tablet users see content. "Pictures on the Ceros are sharper, clearer and brighter than anything else on the market today," says Li.

With a Rockchip RK3188 quad-core processor and a huge 2GB of RAM, Li says the [Ceros Android tablet](#) is able to handle multiple apps, stream and play videos, and do a number of tasks without slowing or stalling. "Ceros tablet users get what they want done ten times faster," says Li. "Little else can compare to this Android tablet."

What was truly amazing is with an 8000mAh battery Li says the Ceros Revolution tablet is able to keep going for longer than any other device existing in the market.

With a launch price of 239.99 USD Li says the Ceros Revolution tablet is only selling at half the price of a tablet with similar specifications. "Most brands spend their money marketing their brands," says Li. "Ceros spends its money on truly innovative and affordable products."

Chinavasion is a Hong Kong and China based wholesaler specializing in [Android tablets](#). For more information and pricing on all their products, see <http://www.chinavasion.com>
