

Easy-to-Use and Quick-to-Deploy Secure and Private Communications

Privato PrivateMail™ easily and efficiently secures how businesses can transmit secure documents using the simplicity of email. Send secure messages safely to anyone.

PrivateMail messages and attachments are automatically encrypted when sent and decrypted when received with PrivateMail.

PrivateMail content, attachments and message header is encrypted and hidden from the outside world.

New Webmail interface allows for multiple access channels for PrivateMail from the Web, PrivateMail client, or on mobile devices.

Signup, activate and you're ready to go.

Meets "data-in-motion" requirements to be compliant and legal for transmitting client and patient information.

Why You Should Use PrivateMail

Works with your existing email

PrivateMail simply integrates directly into your email to provide a trusted communications channel to ensure that sensitive email, documents and personal information are delivered and received only by the intended recipients. Or you can use the Webmail for a separate, secure account.

Communicate privately and securely with others

Simply signup for PrivateMail and you can send secure messages to other PrivateMail subscribers or send emails to public email addresses where the recipient will receive a secure link to view, download attachments and reply to your message.

PrivateMail automatically secures the entire message

PrivateMail ensures encryption to the entire message header, body and attachments. No one other than the intended recipient can access and read the message.

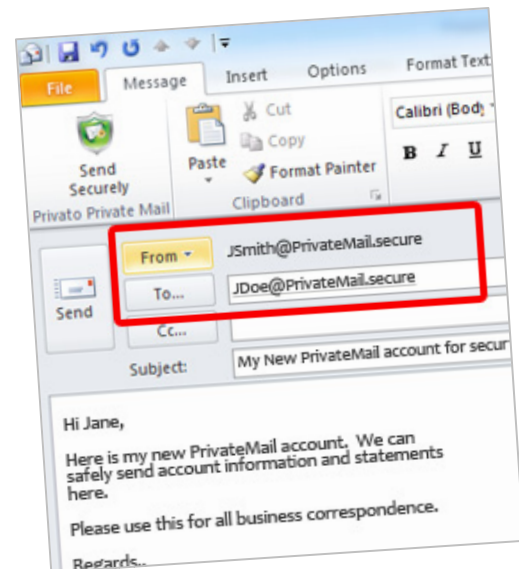

PrivateMail protects your business, family and clients

PrivateMail is transmitted over a completely private and secure email channel where the risk to your information is diminished.

Protect the exchange of confidential, financial or personal data

Ideal for healthcare, finance, accounting, legal, government and SMBs

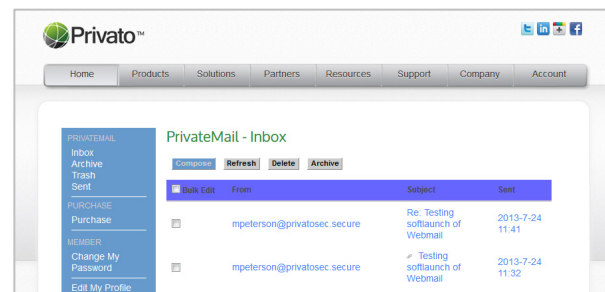

Communicate securely and confidently with business partners and clients

Using PrivateMail you can send documents, attachments and messages worry free!

Securely send, receive and reply to your private messages to suit your business practices. Use popular email programs, the web or mobile devices.

Clients, patients and the people you do business with get a secure Inbox to communicate with you.
