

TASKLAB PRESENTS...

TASKONE for the iPhone 4/4s/5

Premium Mobile Experience

TaskLab has just set the new standard.

Introducing TaskOne, a breakthrough iPhone case that not only provides premium protection for your phone, but transforms it into a fully functioning multi-tool that fits in your pocket. TaskOne combines 22 of the most useful tools engineered into a package thinner and slimmer than most other cases.

Premium Functionality & Protection

TaskOne contains twenty-two useful stainless steel tools that are ultra light and incredibly strong. These tools are made to withstand the abuse of real life without ever damaging your phone. Some of the tools included in TaskOne are a 2.5" knife, 1.8" saw blade, small and large flathead screwdriver, Phillips screwdriver, pliers with integrated box wrenches, spoke wrenches, wire cutters, 6 metric Allen wrenches, wire stripper, bottle opener, ruler and kickstands.

TaskOne houses its tools in a light but strong precision aircraft aluminum enclosure that is connected to your phone through molded outer polycarbonate bands. Use of the tools is simple - when stored the tools are safely secured via custom spring assemblies. They can easily be extended by the low-profile buttons on the back of the phone and are automatically fixed in the extended position during use. The raised bezel on the front of the case provides superior protection for your screen and the knife is removable in seconds with no tools so you can still take TaskOne with you when you fly.

TECH SPECS

Reinforced Protection
