

South Beach Skincare, a company who prides themselves in offering only the very best and proven products in the cosmetic market claims their simple cream, LifeCell makes wrinkles and fine lines vanish in 17 seconds has the caught attention of <http://healthavenger.com> 's Stan Stevenson, prompting an investigative review.

"Life Cell, and the ingredients it contains, has been researched and tested in the Yale, Harvard, Cornell and Oxford University medical departments in a wide and long series of independent studies," reports Stevenson. "Using scientifically proven methods, <http://healthavenger.com/go/LifeCell/> LifeCell literally melts away those lines and wrinkles that plague us each and every time we look in the mirror. Its simple application and light boosting effect works until you wash your face and after that you can simply just re-apply it."

The key ingredient in LifeCell is Dithiolane-3-Pentanic Acid Anti-Inflammatory and Anti-Oxidant (D3PA), one of the most powerful anti-oxidants known to man that attacks and fights the free radicals, the major cause of wrinkles and fine lines on the skin. Muscle Toning, Firmness Activator, and an incredible anti-aging product, Deanol not only firms and tones the skin within just a few days of use, but actually increases muscle tone and therefore creates a younger look in the long run. LifeCell also contains Super Anti-Oxidant Ubiquinone that helps the body produce collagen and elastin. The Ultimate Botox Alternative, Acetyl Hexapeptide-3 provides the same results as Botox, but without the need for damaging injections. The cream also contains Ascorbyl Palmitate, the essential vitamin C to promote collagen synthesis and protect the skin from the dangers of the sun and UV radiation.

"This anti-aging cream is for everyone who cares about their appearance. From young to old and male to female, LifeCell offers all of us the chance to not only improve how we look right now, but also ensures that we continue to look our best as the years roll by," says Stevenson. "It is a cream that you apply to your face in exactly the way which you'd use any other cream. However, within seconds of application, this incredible potion gets to work on all those aging skin conditions that we can't avoid experiencing as we grow older. In fact, it begins to work and change your appearance in the way that harmful and sometimes painful Botox injections and other invasive chemical treatments do, but without the inherent risks involved."

"Due to a revolutionary light technology that reflects and gets rid of the shadows that cause the human eye to be able to distinguish a wrinkle, LifeCell truly makes fine lines and wrinkles virtually disappear within 17 seconds of the first application. All the ingredients used are totally harmless, unlike dangerous collagen and Botox injections and other invasive treatments such as chemical skin peels. By simultaneously using powerful anti-aging and anti-wrinkle ingredients, LifeCell not only has an immediate youth giving effect, but also improves the skin condition and appearance in the long run. It works, pure and simple and is possibly one of the most unique anti-aging products released in the market."
