

## ABOUT US

Senior Care Central provides links to quality, affordable, professional caregivers and health-related information. Our pool of caregivers is made up exclusively of nursing students and certified nursing assistants.

- Help your loved one age in place
- Choose your caregiver from our pool of more educated, local caregivers
- Maintain control over scheduling care assistance according to your needs
- Save money over other long term care options, with greater flexibility
- Access resources on health topics

## IS SCC RIGHT FOR ME?

Senior Care Central grew out of the recognized need for quality, affordable care for people in their home. We are not a home health care agency, but rather link people seeking care to qualified caregivers in their geographic area. Allowing persons to negotiate their own care arrangements provides more flexibility.

SCC charges only a one-time, low fee for lifetime membership and unlimited access to our caregiver pool and resources. Visit the website, complete the easy profile of your needs and browse the caregivers in your area to find the best match for your care situation.

## OUR SERVICES

Many older adults experience health issues that make it hard for them to remain at home. In addition to the high cost of assisted living or a nursing home, older persons generally prefer to stay in their own home. SCC helps people age in place and preserve their assets while still getting the care they need. Our online service is useful for:

- Those seeking care for older parents
- Persons seeking short-term services so that they can take a vacation or have a break from care provision
- Older adults or persons with disabilities who want to age in place at home but do not qualify for insurance coverage of home health care services
- Persons who need a private sitter

## A UNIQUE CARE OPTION

The mission of SCC is to link persons who are seeking care with quality, affordable, professional caregivers. Our pool of caregivers includes only nursing students and CNAs. Coordinate directly with the caregiver that you choose from our database.
