Underground Storage Tank Regulation Review Course

NJIT + One Day = .6 CEUs

CALLING ALL OWNERS/OPERATORS OF UNDERGROUND STORAGE TANKS

Why do I need this course?

The New Jersey Underground Storage Tank (UST) regulations (NJAC 7:14B Subchapter 13) require that all personnel who install, close, test, and design corrosion protection systems or perform subsurface evaluation for USTs need to be certified. Subsurface Evaluation certification is also needed to evaluate impacts caused by unregulated USTs and UST sites that have discharges associated with them occurring prior to November 4, 2009. All owners/operators of USTs that are removed or closed in-place after November 4th, need to retain the services of a Licensed Site Remediation Professional (LSRP) to conduct subsurface evaluations and remediation. This UST certification course will summarize existing UST requirements as well as NJDEP's new LSRP program and the implementing statutes and regulations.

REGISTER TODAY!

Course Length

One Day Class

Cost
\$320*

*Price includes cost of class material

Date

February 13, 2013

Time
