YOUR CDISC CONVERSION 4x FASTER!

CDISC® (Clinical Data Interchange Standards Consortium) established new data standards to speed up data review and improve clinical data exchange, storage and archival. The FDA requires clinical data submission in CDISC SDTM (Study Data Tabulation Model) standards.

CDISC Express is a solution of choice for advanced clinical SAS programmers to convert clinical data into CDISC SDTM standards. CDISC Express is a powerful SAS®-based mapping tool that streamlines and automates the process of SDTM data conversion. CDISC Express includes the automatic creation of Define.XML, a generic SDTM validation tool as well as an advanced lab module.

WE LEVERAGE THE FULL POWER OF CDISC EXPRESS TO CONVERT YOUR DATA

CONVERSION

- ✓ Audit of your clinical data and set up of a conversion plan.
- ✓ Extraction of your data from your eClinical systems into SAS data sets.
- ✓ Creation of the CDISC SDTM mapping specifications.
- ✓ Generation and validation of CDISC SDTM datasets.
- ✓ On-demand helpdesk support for your team.

WE CAN TRAIN YOUR TEAM TO MAP YOUR OWN CLINICAL DATA

TRAINING

- ✓ Training on CDISC SDTM standards.
- ✓ Logical workflow to develop your SDTM domains.
- ✓ Mapping of your own clinical data with CDISC Express.
- ✓ Dedicated support platform for your team.

“The training was a great experience. We look forward to working with CDISC Express on our own studies.”
