

Java Training. Web Development Training. Open Source Training.

Personalized. Relevant. Friendly. Yeah, we do that.

Java

- Introduction to Java Training
- Advanced Java Programming
- Effective Java Programming
- Database Development with JPA
- Java Threaded Programming
- Developing Applications using NIO
- Introduction and Advanced JSP
- Introduction and Advanced JSF 2.0
- Introduction to EJB 3.1
- Java Performance Tuning
- And more . . .

Web Development

- Introduction to HTML / XHTML
- HTML5 Fundamentals
- Introduction to CSS
- Introduction to JavaScript
- JavaScript with DOM Scripting
- Advanced JavaScript
- Introduction to AJAX
- Developing AJAX with AJAX Toolkits
- Designing Usable Websites
- Website Accessibility (Section 509)
- And more . . .

Ruby on Rails

- Ruby on Rails Boot Camp
- Introduction to Ruby
- Introduction to Ruby on Rails
- Advanced Ruby
- Advanced Rails
- And more . . .

Open Source

- Introduction and Advanced MySQL
- Tomcat Administration
- JBoss Administration
- ActiveMQ Administration
- Apache Struts
- Spring Framework Fundamentals
- And more . . .

PHP

- Introduction to PHP
- Advanced PHP
- Cake PHP
- The Zend Platform
- And more . . .

Web Services & SOA

- Introduction to Web Services
- Web Services Development with Java
- Developing RESTful Web Services
- Fundamentals of XML
- Advanced XML using Schemas
- XML Transformations using XSL
- Fundamentals of SOA
- And more . . .

Languages and Platforms

- C/C++
- Objective C
- Python
- CUDA / OpenCL
- iPhone Development
- Android Development

Software Engineering

- Introduction to RUP
- Writing Software the Agile Way
- Introduction to XP
- Introduction to SCRUM
- And more . . .

Software Design

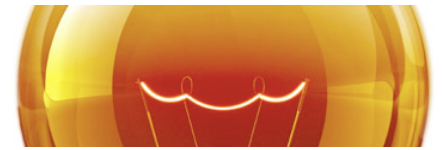

- Introduction to OOAD
- Designing OO Systems with UML
- OO Design Patterns
- Test Driven Development (TDD)
- Fundamentals of Software Architecture
- Advance Software Architecture
- The Elegant Art of Refactoring
- And more . . .

Software Management

- Java for Managers
- .NET for Managers
- LAMP for Managers
- Managing Application Development
- SOA for Managers
- Hiring Technical Staff
- Managing Technical Staff
- And more . . .

Not finding what you are looking for?
 Don't worry. Just ask us.
 We offer the best customization program available on the market.
 Oh, and it's free.

Instructor-Led Delivery Options

At Your Location

*People learning from people
- in-person -*

Is in-person learning right for me?

Yes - if your team is located in a single location *or* they like to learn in a dynamic classroom setting.

What do I need to provide?

A formal training room is ideal. But, all you really need is a room capable of supporting the course. We'll show up with the rest.

Will the course be all lecture?

Certainly not. Developers learn by doing.

In an in-person course, you'll learn by doing at least 50% of the time. The other 50%, you'll learn through interactive discussions with the instructor and the other students.

Can I train *everyone*, at once?

Sure - we can help you with that. But, not all at once.

We like to keep in-person course sizes to around 10 students. But we can accommodate as many as 16 students.

When's lunch?

It's your class - start-times, end-times, and lunch-breaks, are entirely up to you.

We're here to help your brain fill-up, not fry. So, we suggest no more than 7 hours of learning each day.

How much is it?

Duration	Base**	Tuition
1-Day	\$5,995	} \$695
3-Days	\$7,995	
5-Days	\$9,995	

*Base covers all fees & tuition for the first 3 students.
+Base for Mobile Application Development and OpenCL/GPU are slightly higher.

In Our Virtual Classroom

*People learning from people
- on-line -*

Is on-line learning right for me?

Yes - if your team is scattered across multiple locations *or* you need a flexible delivery schedule.

What do I need to provide?

All you need are Flash-capable computers connected to the internet, and a phone. The virtual classroom has the rest.

Will the course be all lecture?

Certainly not. Developers learn by doing.

In an on-line course, you'll learn by doing at least 35% of the time. The other 65%, you'll learn through interactive discussions with the instructor and the other students.

Can I train *everyone*, at once?

Sure - we can help you with that. But, not all at once.

We like to keep on-line course sizes to around 15 students. But we can accommodate as many as 20 students.

When's lunch?

Sorry, no soup for you. On-line courses don't usually have lunch breaks. So, feel free to eat whenever.

To make sure everyone stays engaged, we suggest no more than 5 hours of on-line learning each day.

How much is it?

Duration	Base**	Tuition
1-Day	\$4,995	} \$695
3-Days	\$6,995	
5-Days	\$8,995	

*Base covers all fees & tuition for the first 3 students.
+Base for Mobile Application Development and OpenCL/GPU are slightly higher.

Better Learning. Guaranteed.

Can I customize the course?

Yes! In fact, we customize every course based on the backgrounds of the students, their roles, and the project they are working on.

Help! I'm Lost!

We understand learning is a process, not a single event. That's why every single student in every single course receives an annual subscription to Safari Books Online.

With instant on-demand access to over 16,000 books, videos, and rough cuts, you'll never be lost in the middle of the "coding jungle".

What if the course goes "south"?

We hope that never happens. We do our best to make sure you get exactly what you need.

But, in the unlikely event something does go wrong, we'll give you a 100% refund.

About DevelopIntelligence

How long has DI been doing this?

We've been improving the capabilities of software development organizations through the delivery of learning solutions for over 16 years.

Who has DI taught?

Due to the sensitive nature of our clientele, we don't disclose our client list.

But, if you've ever talked on the phone, watched a movie, driven in a car, flown on a plane, banked or shopped online, there's a good chance you're interacting with one of our customers.

Is DI any good?

We're not the bragging type. We'd be thrilled to put you in contact with one of our 40,000+ students so you can ask them first hand.
