

Robotic Vacuum Cleaner: **iCLEBO**

THE ONLY WI-FI ENABLED, SMARTPHONE CONTROLLABLE ROBOTIC VACUUM CLEANER! iCLEBO, MODEL NO. SMART, ARTE or POP

- **Wi-Fi Enabled**, The Only Robotic Vacuum with Wi-Fi Capabilities
- **Smartphone Full Access**, Control your Smartphone Anywhere & Anytime
- **Superior Engineering**, Highly Sophisticated Advanced Technology

Wi-Fi Enabled – “The Possibilities are Endless”

iCLEBO is the only robotic vacuum cleaner that exclusively provides this incredible Wi-Fi technology to its end users.

With the industry-first Wi-Fi enabled robotic vacuum cleaner ready to hit the US Market, consumers are already buzzing about the endless possibilities of this incredible functionality.

iCLEBO focuses on the need to always be innovative in its approach in order to provide their customers with consistently great products that they will love and use. Everything is going mobile and thanks to iCLEBO, your robotic vacuum cleaner is now Wi-Fi connected!

Smartphone Full Access – “Complete, Convenient Control”

The convenience of being able to access and control your robotic vacuum cleaner from anywhere, at anytime is highly attractive to buyers. Lets say you forgot to schedule a cleaning. You're out of town or end up having an unexpected late night out yet need to entertain guests the next day. Well, in that case you can now easily access your robotic vacuum cleaner using your Smartphone to control your iCLEBO. No other brands provide this matchless feature.

Utilize your Smartphone to turn your robotic vacuum cleaner ON/OFF, control all features, change settings of your iCLEBO, watch it clean with its wide-angled quality camera through its “Live Viewing” option and designate which rooms you wish to be cleaned or untouched.

Superior Engineering – “Difference of How it Moves”

For robotic vacuum cleaners, it is vital that the machine is precisely capable in analyzing the space. Being able to systematically determine how to cover all the surrounding areas to be cleaned for long periods of time without interruption is key. This is why iCLEBO is equipped with triple CPUs composed of the following: Micro Controller Unit for superior power management, dynamic vision and control. iCLEBO's triple CPUs are engineered by the best robotic manufacturer in the world with over 20+ years of passionate professional experience within the robotic technology industry.

The sensors detect the ambient environment 200 times per second, while the advanced navigation algorithm goes through a 10,800 times per second analysis. It has a 24 frame recording that is similar to the movement in nature. Through the use of its interface system known as “Camera Vision Mapping”, iCLEBO enables smart and confident cleaning with firm control. The camera recognition is super precise, it is as if one is moving and looking through a human eye. iCLEBO brings innovation to the forefront with their three extraordinary robotic vacuum cleaner models: *Smart, Arte* and *Pop*.

iCLEBO "Smart" \$599

- Wi-Fi Enabled Capabilities
- Smartphone (full access and control)

iCLEBO "Arte" \$499

- Camera Vision Mapping (never misses a spot)
- Meticulous Cleaning Method (no clogging)

iCLEBO "Pop" \$399

- Dual Whirling Feature (intensive cleaning)
- Longest Lasting Battery (Lithium-ion)
