

HD NVR Security System

QUALITY REDEFINED WITH THE NEXT GENERATION SECURITY MONITORING SYSTEM – NETWORK VIDEO RECORDING BY DAEWOO (Model No. HD4008)

- **Quality**, Super Clear “Live” Image Quality, Far Above the Rest, Providing H.264 IP Cameras in 1080p at “45 fps”
- **Special**, Longest Hard Drive Recording Time within the Entire Industry, Offering 1/3/5/7/10/15/30 fps Options
- **Effective**, Save Money and Time
- **Easy**, Remarkably Simple

QUALITY – Far Superior than the Rest!

DAEWOO (Model No. HD4008) uses amazing H.264 IP camera technology that captures video in 1080p at 45 fps, offering the highest frame per second within the entire industry – Providing unmatched clear quality images in “Live Viewing”. DAEWOO’s unique feature, the 1080p at 45 fps is as if you’re watching Analog DVR images but with much higher quality – Crisp and vibrantly clear! There are never underexposed pictures, grainy distortions or unwanted noise – users get unbelievably clear high-definition video all day and night. DAEWOO IP cameras have strong sensitivity at low lux, so images are expressed with fine, vivid colors in the dark.

The recorder in the DAEWOO HD4008 allows you to experience exclusive custom recording options in 1/3/5/7/10/15/30 fps – Get the longest Hard Drive recording time that exists in today’s market by leaps and bounds! Other competitor products only offer recording time options in 15 or 30 fps which makes a 2TB Hard Drive full within just 2 days! Why settle for less when you can obviously have the best in DAEWOO? A confident leader in Network Recording Video Systems has arrived and no one else even comes close in matching quality – DAEWOO is simply far superior than the rest!

**IP 66 Full HD 2 Megapixel
Night Vision IP Cam**

**Full HD 2 Megapixel
Mini Outdoor Dome IP Cam**

SPECIAL – Advanced Functions that Redefine What Looks Good!

- **Triple Streaming** – IP cameras deliver quality HD images to HDD for recording, it also sends HD and SD images for live viewing.
- **3D – Digital Noise Reduction** – 3D-DNR technology compares a pixel with its neighboring pixels to detect and remove all unwanted noise found within the frame.
- **WDR (Wide Dynamic Range)** – By balancing overexposed and underexposed pictures, it displays clear quality images.
- **TDN (True Day/Night)** – By changing filters automatically to control IR light, it creates a more defined picture during the day and night.

EFFECTIVE – Creating Opportunities Elsewhere!

DAEWOO HD4008 NVR kit offers you a cost-effective system that can be easily switched from an existing analog CCTV system to an IP network-based high-definition system.

Have the ease of enabling digital IP camera functionality in the existing coaxial infrastructure with no disruption with your existing CCTV services. DAEWOO makes it real simple for its consumers while finding creative ways to save them money too! In addition, the megapixel cameras are designed so users can see more of the rooms versus a standard analog security camera could. Basically, save time and money by installing less cameras while capturing the entire scene.

EASY – Convenient to the Core!

Simple plug and play installation makes the consumers' life so much easier! Users can make direct monitoring set up through coax cables from the camera output. It is easier and faster than using a remote computer.

During the web set up, users can control the focus and zoom functions by operating two motors automatically. This helps users control focusing much more efficiently and quicker. DAEWOO HD4008 is all about creating the best user experience!
